TO THE TEACHER

The inspiration for The Ultimate Phrasal Verb Book came about when a student asked me for a textbook to help her learn the meanings of common phrasal verbs. I had nothing to offer. The only textbook focusing on common verbs that I could give her contains not one phrasal verb — it teaches arise but not get up, awake but not wake up, seek but not look for.

Phrasal verbs are verbs, not idiomatic curiosities. There is no logic to classifying take over with take the bull by the horns. Phrasal verbs are an essential part of spoken and written English at all levels, and no student who hopes to master the language can afford to overlook them.

Although this textbook is intended primarily for high-intermediate to advanced students, ambitious students at lower levels will benefit from it as well. Only some FOCUS sections may prove to be a little beyond them; otherwise, there is nothing to prevent any student from studying the definitions and examples and attempting the exercises.

A vocabulary textbook should provide mechanics as well as meaning. Students want to know more than what a word means — they want to know how to use it correctly.

The importance of mechanics is the reason for the emphasis on the prepositions required when some phrasal verbs are used transitively and for the inclusion of reviews of points of grammar not specific to phrasal verbs. Prepositions are the glue that holds English together, but many students falter when using newly learned verbs because they do not know that a preposition is also required, or if they do, which one. This aspect of English is not given the attention it deserves because it is difficult to teach — there are no rules that govern when a preposition, or which preposition, is required, and no teacher likes to say "You just have to remember."

The hope of the latter feature, the discussion of points of grammar not specific to phrasal verbs, is that combining practice with phrasal verbs and practice with a variety of grammatical structures will increase not only the student's confidence in the knowledge of phrasal verbs but also his or her willingness and ability to use them in a wider range of situations.

There is inevitably a degree of oversimplification. That phrasal verb particles are sometimes prepositions and sometimes adverbs is mentioned only once. No purpose is served by differentiating between them, and the overlap between the two is confusing to the student. Phrasal verbs are not identified as transitive or intransitive because this is dictated by logic. Less common meanings of some phrasal verbs have not been included. Adverb placement is presented and illustrated in simplified form without discussion of the different types of adverbs — doing so would have gone beyond the scope of this textbook.
And no differentiation is made between recognized adjectives derived from past participles and past participles with adjectival meaning. The adjectival use of past participles (both phrasal and nonphrasal) is an extremely important aspect of spoken English — something every student of English should be familiar with — yet the dividing line between true adjectives derived from past participles and passive sentences employing past participles with adjectival meanings is ill-defined and problematic. Native speakers of English regularly use past participles in superficially passive sentences with purely adjectival meaning. Whether the past participles are verbs or actually adjectives is of no concern to the native speaker and is entirely irrelevant to the student of English. Rather than distract the student with an unnecessary element of confusion, both are referred to as participle adjectives throughout this textbook.

The exercises in this textbook are intended to reinforce meaning and mechanics. A cloze exercise always comes first, followed by exercises focusing on sentence structure and the FOCUS discussion. Last are exercises that ask the student to answer questions or write original sentences.

There is a good deal of review built into this textbook. Every section contains two or more exercises requiring the student to refer back to a previous section in order to review a phrasal verb, participle adjective, or noun. When a phrasal verb has two or more meanings, it is intentional that no help is provided to the student in determining which meaning applies; students have to review them all and figure it out for themselves.

I have tried in this textbook to imitate the form and content of everyday English. If occasionally the register and subject matter of some examples and exercises seem not quite right for formal discourse, that is deliberate. Students need to learn formal English, of course, but since most people speak informally most of the time, students need to gain familiarity with the syntax, usage, and content of the informal English they read and hear every day at work, at school, at home, and on television.

TO THE STUDENT

Phrasal verbs are combinations of ordinary verbs like put, take, come, and go and particles like in, out, on, and off. They are a very important part of everyday English. Every student of English needs a basic understanding of the most common phrasal verbs and also of common nouns and adjectives made from phrasal verbs.

Most phrasal verbs are not informal, slang, or improper for educated speech or formal writing. Exactly the opposite is true — most phrasal verbs are acceptable at all levels of spoken or written English. In fact, for many of the phrasal verbs in this textbook, there is no alternative to the phrasal verb — there is no other way to say it.
However, a few phrasal verbs in this textbook are identified as informal, and it is better not to use them in serious, formal speech or writing. But these informal phrasal verbs are important because they are very common in everyday informal speech and writing.

Some phrasal verbs are very easy to understand. For example, it is not difficult to understand sit down or come in because their meanings are obvious. But many phrasal verbs are very idiomatic. Idiomatic means that there is no way to know what the verb and particle mean together by knowing what the verb and particle mean separately. For example, every beginning-level student learns what the words call, run, off, and out mean, but that does not help the student to know that call off means cancel or that run out means use all of something.

Each section of this textbook starts with a FOCUS, an explanation of something important about phrasal verbs. Then eight phrasal verbs and an explanation of each important meaning of each one are presented along with one or more example sentences for each meaning. Following that are several exercises to help you understand and remember what the phrasal verbs mean and how to use them in a sentence. And like real conversation, questions asked with I or we are answered with you, and questions asked with you are answered with I or we.

And because there is a lot to learn in this textbook, there is a lot of review to help you learn it. Every phrasal verb is reviewed at least twice later in the book. The more idiomatic phrasal verbs are reviewed more often, and the more important meanings of phrasal verbs with several meanings are reviewed more often.

Terms, Abbreviations, and Symbols Used in this Textbook

**verb**  
Verb refers to the verb part of a phrasal verb. In other words, the phrasal verb minus the particle. In the phrasal verb pull over, pull is the verb and over is the particle.

**particle**  
The adverbs and prepositions in phrasal verbs are both called particles in this book. Many particles are adverbs and prepositions, and it can be very difficult and confusing to figure out if a particle in a particular phrasal verb is one or the other. Fortunately, this is almost never important to the student, so it is a lot easier to simply call them both particles.

**p.v.**  
phrasal verb n.  
a noun made from a phrasal verb

**part.adj.**  
particle adjective — a past participle of a phrasal verb used as an adjective put on it. When words or sentences have a line through them, it means that they are incorrect.

...  
Three dots between the verb and the particle mean that the object of the phrasal verb can be placed between the verb and the particle.
1. FOCUS ON: separable and nonseparable phrasal verbs

Phrasal verbs are either separable or nonseparable. Unfortunately, there is no rule that will help you to look at a phrasal verb and always know whether it is separable or nonseparable.

Separable phrasal verbs

Separable phrasal verbs can be separated by their object. When the object is a noun, it is usually entirely optional whether the object is placed between the verb and the particle or placed after the particle. Both sentences below are correct:

I took my shoes off.
I took off my shoes.

However, when a pronoun is used instead of a noun, the pronoun must be placed between the verb and the particle:

I took them off.
I took off them.

But in one type of sentence, separable phrasal verbs must be separated — when the phrasal verb has two objects:

She put a blanket on.
She put on a blanket.

Nonseparable phrasal verbs

Nonseparable phrasal verbs cannot be separated by their object:

He ran into a tree.
He ran a tree into.

Throughout this book, phrasal verbs that can be separated have three dots (...) between the verb and the particle.

2. FOCUS ON: phrasal verbs and *do, does, and did*

Like ordinary verbs, phrasal verbs form negatives and questions with *do, does, and did*.

**Present tense questions**

In the present tense, questions are formed with *do* (except when the subject is *he, she, it, or the name of one person or thing*):

- Why do I always fall for losers?
- Do you sometimes doze off in class?
- Do we ever give in to pressure?
- How do these bottle tops come off?

When the subject is *he, she, it, or the name of one person or thing*, *does* is used. Remember that the *-s* form of the verb is not used in questions:

- Does this welding torch throw sparks up into the air?

**Present tense negatives**

In the present tense, negatives are formed with *do not* or *don't* (except when the subject is *he, she, it, or the name of one person or thing*):
I used to doze off while driving, but I don't anymore. I think he has the flu because you don't usually throw up when you have a cold. We don't usually fall for crazy stories like that. If his dogs do not stay off our lawn, I'm going to call the dogcatcher.

When the subject is he, she, it, or the name of one person or thing, does not or doesn't is used. Remember that the -s form of the verb is not used in negatives:

If Mark doesn't pull through, five children will be without a father.

Past tense questions
In the past tense, questions are formed with did. Remember to use the infinitive form of the verb:

I'm so embarrassed. Why did I fall for his lies? Did the patient pull through? How many times did he throw up? Did we give in to their demands? Did they hear about the explorer who was eaten by piranhas?

Past tense negatives
In the past tense, negatives are formed with did not or didn't. Remember to use the infinitive form of the verb:

I was really sick, but I didn't throw up. You didn't fall for that nonsense, I hope. He pulled and pulled, but the bowling ball didn't come off. We didn't hear about the half-price sale until it was too late. I'm sorry. We tried everything, but she didn't pull through.

5. FOCUS ON: pronunciation of two-word phrasal verbs

Nonseparable phrasal verbs

Intransitive nonseparable phrasal verbs (verbs that do not allow an object) are usually accented on the particle:

The barn got hit by lightning, and it burned DOWN.

Ned drank so much that he passed OUT on the bathroom floor.

Transitive nonseparable phrasal verbs (verbs that require an object) are usually accented on the verb:

Hank's been CHEATING on his wife for years.

I told the teacher my dog ate my homework, but she didn't FALL for it.

Separable phrasal verbs

Separable phrasal verbs (which are always transitive) are usually accented on the particle:

The British soldiers tried to burn DOWN the White House.

The teacher passed them OUT.

As the examples above show, a single phrasal verb can belong to more than one category depending on its meaning.

EXERCISE 6d — Review the explanation at the beginning of Section 5 of how two-word phrasal verbs are pronounced. Then, say each sentence in Exercise 6c aloud and circle the verb or particle that is accented.
7. FOCUS ON: separable phrasal verbs with long objects

We have seen that the object of separable verbs can be placed between the verb and the particle or after the particle:

- clear: I looked up the word.
- clear: I looked the word up.

When the object is short — one word or just a few words in length — the meaning is clear either way. However, when the object is several words long, it can be awkward and confusing to place the object between the particles:

- clear: I looked up the words that our teacher said were really important and would probably be on the final exam.
- confusing: I looked the words that our teacher said were really important and would probably be on the final exam up.

It boils down to the following.

Short objects can be placed between the verb and the particle or after the particle:

- She put on her dress.
- She put her dress on.

Pronouns, such as him, her, and it must be placed between the verb and the particle:

- She put it on.

And long objects should be placed after the particle to avoid confusion:

- She put on the new dress with the red, yellow, and blue flowers that she bought last week for 40 percent off.

The present perfect is formed with *have*, or when the subject is *he, she, it, or the name of one person or thing, has*, and the past participle of the verb:

- present: The tree **falls over**.
- past: The tree **fell over**.
- present perfect: The tree **has fallen over**.

Remember that *have* can be combined with pronouns as 've:

They’ve never heard of him. and has with

nouns and pronouns as's:

- The tree’s **fallen over**.
- He’s never heard of her.

Be careful not to confuse the's contraction of has and the's contraction of is:

She’s **picked out** some library books. (She **has**...) She’s **picking out** some library books. (She **is**...)

9. **FOCUS ON:** two-word phrasal verbs that require an additional particle when used with an object, 1

With some two-word verbs you must use a second particle when the verb has an object:

- The criminal broke out.
  - The criminal broke out of prison.
- Tom and Jerry don't get along.
  - Tom and Jerry don't get along with each other.

Sometimes, as with break out and break out of, there is no change in meaning. Sometimes, as with hang up and hang up on, there is a small change in meaning. And sometimes, as with hook up and hook up to, the second particle is necessary not when there is one object but only when there are two:

- I hooked up my new CD player.
  - I hooked up my new CD player to my stereo.

There is no good way to always know which second particle must be used or if and how it will change the meaning of the verb. The best thing to do is to simply memorize each case.

Throughout this book, two-word phrasal verbs that require an additional particle when used with an object are shown with the second particle in parentheses:

- break out (of)

Do not confuse two-word phrasal verbs that require an additional particle when used with an object with three-word phrasal verbs. Three-word phrasal verbs always have three words — there is no two-word version, or if there is a phrasal verb with the same verb and first particle, it has a different meaning and is classified as a different verb. For example, break out and break out (of) are included in one definition because they have the same meaning, but put up and put up with have different meanings and are classified separately.

10. FOCUS ON: phrasal verbs used as nouns, 1

Many two-word phrasal verbs can be used as nouns. All the verbs in this section have a noun form. Notice that the two-word noun is sometimes written with a hyphen:

verb: go ahead
don noun: go-ahead

and sometimes as one word:

verb: lay off
don noun: layoff

Unfortunately, there is no rule that will help you to always know which form to use. Also, not everyone agrees which nouns should be hyphenated and which should be written as one word, so you will occasionally see a noun written both ways.

11. FOCUS ON: phrasal verbs used in
compound nouns

As we saw in Section 10, many two-word phrasal verbs can be used as nouns. Many of these
nouns formed from two-word phrasal verbs can be combined with ordinary nouns to form
compound nouns:

- **noun**: backup
  - compound noun: backup disk
- **noun**: follow-up
  - compound noun: follow-up call

Like ordinary compound nouns, the first noun has a function similar to that of an
adjective:

- **question**: What kind of clothes?
- **answer**: Dirty clothes.
  - **adjective**
- **question**: What kind of clothes?
- **answer**: Workout clothes.
  - **noun**

The adjective dirty and the noun workout serve the same function: modifying the noun
clothes. Always accent the first word in a compound noun:

- **noun**: BACKup
  - **compound noun**: BACKup disk
- **noun**: FOLLOW-up
  - **compound noun**: FOLLOW-up call

13. FOCUS ON: passive phrasal verbs, 1

The *passive voice* is used when what happened (the verb) is more important than who did it (the subject):

The scene of the crime was **dosed off** by the police.

when the subject is obvious:

The tests were **handed in**. (by the students — who else?)

or when the subject is unknown:

My dog was **run over**. (by an unknown person)

The passive is formed with *be* and the past participle of the verb. *Be* can be in any tense and can be continuous:

The game has been **called off**.
My name was **left off**.
The tent is being **set up**.
The criminals will be **tracked down**.

As we saw in the first three examples, saying who performed the action with a *by* phrase is optional, but it is always possible. This is a good way to test a sentence to see if it is in the passive:

The game has been **called off** by the referee.
My name was **left off** by Charles.
The tent is being **set up** by the campers.
The criminals will be **tracked down** by the police.

14. FOCUS ON: participle adjectives formed from phrasal verbs, 1

The past participles of many English verbs can also be used as adjectives. You will see that sentences with adjectives formed from past participles are very similar to sentences with verbs in the passive voice: in both cases a form of be is used with the past participle. For this reason, it is not always easy to say whether a sentence contains an adjective formed from a past participle or a verb in the passive voice:

The door **was closed**. (Is this a passive sentence or is **closed** an adjective?)

Sometimes, whether a sentence contains an adjective formed from a past participle or a verb in the passive voice is clear from the sentence structure:

The door **was closed by the secretary**, (passive)

The door **was closed when I came home last night**, (adjective)

or the context:

question: What happens if the health inspector finds rats in a restaurant?

answer: It's **closed**. (passive)

question: Is the window open?

answer: It's **closed**. (adjective)

But in some cases it is not possible to say absolutely whether a sentence contains an adjective formed from a past participle or a verb in the passive voice. Fortunately, it is usually not very important because the meaning is often essentially the same. For that reason, throughout this book true adjectives formed from past participles and past participles functioning as adjectives are both classified as **participle adjectives**.

Much more important than the difference between adjectives formed from past participles and past participles functioning as adjectives is what the words mean. Some participle adjectives are written with a hyphen (**make-up**), some without a hyphen (**fixed up**), and some as one word (**rundown**). Because not everyone agrees which participle adjectives should be hyphenated/which should not, and which should be written as one word, you will occasionally see the same participle adjective written with or without a hyphen or written as one word. Also, British English hyphenates many participle adjectives that are not normally hyphenated in American English; many of the participle adjectives shown unhyphenated in this book are hyphenated in British English.
1. **butt in** p.v. When you enter a conversation, situation, or place (especially a line) aggressively, rudely, and without invitation/you butt in.  
   I was trying to talk to Mm at the party, but Bob kept butting in.  
   My father taught me that it's not polite to butt in line; you have to go to the back and wait your turn.

2. **dress up** (like/as) p.v. When people wear old-fashioned clothes or costumes, they dress up, dress up like someone, or dress up as someone.  
   Did you see Charles at the Halloween party? He dressed up like a cowboy.  
   At Jane's costume party, everyone has to dress up as a clown.

3. **dry up** p.v. When the amount or supply of something gets smaller and then disappears completely, it dries up.  
   The factory switched to synthetic rubber after the supply of natural rubber dried up.  
   The small grocery store's business dried up after a huge supermarket opened across the street.

15. FOCUS ON: phrasal verbs and will or be going to

Both will and be going to are used to talk about the future in English, but they are not the same.

Predictions: will or be going to
Use will or be going to for predictions. When you predict the future, you say what you think will happen:

- The wind will blow away these paper plates.
- The wind is going to blow away these paper plates.

Willingness: will
Use only will for willingness. When you offer to do something that you do not have to do, you are willing to do it:

- I will put up the shelves for you.

Plans: be going to
Use only be going to for plans. When you decide to do something in the future, whether it is long and complicated or short and simple, you plan to do it:

- He is going to head for Mexico next week.

The future with will is formed by using will plus the infinitive form of the verb:

- statements: He will come through San Francisco.
- question: Will he come through San Francisco?
- negative: He will not come through San Francisco.

These contractions are used with will:

- I will = I'll
- you will = you'll
- he will = he'll
- she will = she'll
- it will = it'll
- they will = they'll
- will not = won't

When two contractions are possible, it is more common to contract will with not rather than with a pronoun:

- common: He won't come through San Francisco.
- uncommon: He won't come through San Francisco.

The future with be going to is formed with a form of be plus going to plus the infinitive form of the verb:

- statement: He is, going to head for Mexico next week.
- question: Is he going to head for Mexico next week?
- negative: He is not going to head for Mexico next week.
These contractions are used with *be* going to:

<table>

<td>I’m</td>
<td>you’re</td>
<td>he’s</td>
<td>she’s</td>
<td>it’s</td>
<td>they’re</td>
<td>aren’t</td>

</tr>
</tbody>
</table>

When two contractions are possible, both are equally common:

- common: He’s not going to *head for* Mexico next week.
- common: He isn’t going to *head for* Mexico next week.

In informal spoken English, *going to* is often pronounced *gonna*. It is not necessary to pronounce *going to* in this way, but it is necessary to understand it.

17. FOCUS ON: **adverbs and phrasal verbs**

Adverbs are words that modify verbs. Many adverbs end with *-ly*, for example, *quickly, slowly, suddenly, foolishly*; but other adverbs, such as *always, sometimes, and never*, do not. The placement of adverbs in sentences with phrasal verbs depends on whether the verb is intransitive or transitive, and if transitive, whether it is separable or nonseparable. In general, adverbs are placed like ordinary one-word verbs with the exception of nonseparable phrasal verbs, which also allow for the placement of adverbs between the verb and the particle. All possible placements of adverbs in sentences containing the various types of phrasal verbs are shown with Xs:

**Intransitive phrasal verbs**

X subject X verb particle X.

- *Immediately he came over.*
- *He immediately came over.*
- *He came over immediately.*

**Separable phrasal verbs**

X subject X verb particle object X.

- *Angrily she ripped up the paper.*
- *She angrily ripped up the paper.*
- *She ripped the paper up angrily.*

X subject X verb object particle X.

- *She angrily ripped the paper up.*
- *She ripped up the paper angrily.*
- *She ripped the paper up angrily.*

**Nonseparable phrasal verbs**

X subject X verb X particle object X.

- *Slowly we headed into town.* We
  - *slowly headed into town.*
  - *headed slowly into town.*
  - *headed into town slowly.*

**Three-word phrasal verbs**

X subject X verb? particle? object X.

- *Eventually I grew out of the sweater.*
- *I eventually grew out of the sweater.*
- *I grew out of the sweater eventually.*

Placing adverbs within three-word phrasal verbs is sometimes possible, but it can be problematic. Sometimes an adverb between the verb and first particle sounds acceptable and other times it does not. Sometimes, an adverb placed...
between the two particles sounds acceptable, and other times it will not. This is more a matter of style than of what is correct or incorrect, so unless you are sure it sounds okay, it is better not to place adverbs within three-word verbs.

**18. FOCUS ON: phrasal verbs and *can, could, will, and would***

*Can, could, will, and would* are *modal auxiliary verbs*, often called *models*. Modals are very important in English, but they can be confusing because they are used to say many different things. Here is a basic review of *can, could, will, and would* and their most common uses.

**Could** is used as the past tense of *can*:
- I *[can]* *can't* come over tonight.
- I *[coul'd]* *coul'dn't* come over last night.

**Would** is used as the past tense of *will* (the future use of *will* has already been discussed in Section 15) to talk about something that was future in the past:
- I didn't buy that nice coat for my son because I knew he would quickly *grow* out of it.

**Would** is used in place of *will* when repeating someone else's words:
- She said she *would* get next Friday *off*.

**Would** is used as the past tense of *will* to talk about a repeated past action:
- When I worked as a bank guard, I *would* *stand* around all day doing nothing.

Normally, *can, could, will, and would* have different uses, and it is important to use the correct one; however, in one special case — making requests — they can be used with very little difference in meaning:
- Can you *get* off the couch?
- Could you *get* off the couch?
- Will you *get* off the couch?
- Would you *get* off the couch?

*Can and could* are used, with little difference in meaning, to ask for permission:
- Can I think about it before I make a decision?
- Could I think about it before I make a decision?

*Can, could, will, and would* are used in conditional sentences. Conditional means that a condition, usually stated in an if clause, must be satisfied for the main clause to be true.

When the condition is something that is actually possible, the verb in the if clause is normally in the present tense. If the condition in the if clause is something that could not actually be true, the past tense form of the verb is used.

When the condition in the if clause is something that is actually possible, *can* is used in the main clause to discuss a *real ability*:
- If I have a car, I *can* come over.
When the condition in the if clause is something that is actually possible, will is used in the main clause to discuss a real willingness or intention:

If I have a car, I will come over.

When the condition in the if clause is not something that is actually possible, could is used in the main clause to discuss an unreal or imaginary ability:

If I had a car, I could come over.

When the condition in the if clause is not something that is actually possible, would is used in the main clause to discuss an unreal or imaginary willingness or intention:

If I had a car, I would come over.

Either the if clause or main clause can occur first in a sentence, with a slight change in punctuation:

If I had a car, I would come over. I would come over if I had a car.

16. Ned didn't_____________UFOs until he saw one.

19. **FOCUS ON: phrasal verbs and the adverb right**

The adverb *right* is often used to intensify the meaning of a phrasal verb. Placed before the particle, *right* means *directly, immediately, or quickly*. It is not important whether the phrasal verb is intransitive, separable, or nonseparable. What does matter is whether the action of the verb is something that can logically be done directly, immediately, or quickly. For example, it would be illogical to use *right* with *stand around* or *wear down*:

- She **aimed right at me.** (She aimed *directly* at me.)
- I'll **bring it right over.** (I'll *bring it over* immediately.)
- The room **warmed right up.** (The room *warmed up* quickly.)

*Right* can be used when a separable phrasal verb is separated by its object; however, *right* cannot be used when the object follows the particle:

- He **brought my radio right back.**
- He brought right back my radio.

21. FOCUS ON: phrasal verbs and should and ought to

Should and ought to have two important meanings in English. One is familiar to most students, but the other is not.

A good idea: should and ought to

Should and ought to can be used to say that doing something is a good idea because it will benefit the person you are speaking about:

You should zip up your coat.

You ought to zip up your coat.

or because the person you are speaking about is expected, though not required, to do something:

You should bring in the groceries for your mother.

You ought to bring in the groceries for your mother.

Although should and ought are modal auxiliary verbs, ought must be used with to. In other words, ought does not equal should, ought to equals should. Never say should to.

Very probable: should and ought to

Both should and ought to are used to say that something is very probable, very likely, or 90 percent sure to happen — that if everything is normal, as expected, or as planned, a condition will very probably exist or something will very probably happen:

The rebel territory should settle down once winter comes.

The rebel territory ought to settle down once winter comes.

In the examples above, either should or ought to can be used — they have the same meaning — however, only should is used in questions:
Should Tom zip up his jacket?

Ought Tom to zip up his jacket?

and only should not or shouldn't is used in negative sentences:

Tom should not zip up his jacket.

Tom ought not to zip up his jacket.

Should not (or shouldn't) is used to say that something is not probable. It means that something is very improbable, very unlikely, or 90 percent sure not to happen — that if everything is normal, as expected, or as planned, a condition will very probably not exist or something will very probably not happen:

I set the thermostat at sixty-five degrees, and I'm sure it won't get below seventy tonight, so the heat shouldn't go on.

22. FOCUS ON: the particle up and the adverbs right and all

The particle up is used in many phrasal verbs, and one of its uses is to say that something has been done thoroughly or completely:

- The building burned. (The building was damaged but not destroyed.)
- The building burned up. (The building was completely destroyed.)

Right, discussed in Section 19, is often used in phrasal verbs with up to indicate that the action of the verb not only happened thoroughly and completely but also quickly:

- They ate it up. (They ate all the food.)
- They ate it right up. (They ate all the food, and they ate it quickly.)

Remember that right can be used in this way only after an object that is separating the verb and particle:

- They ate the pizza right up.
- They ate right up the pizza.

Even though up indicates that the action of the verb is thorough and complete, all is sometimes used for further emphasis with participle adjectives derived from phrasal verbs with up:

- My taxes are all paid up.
- The drain is all plugged up.
burn up

1. **burn up** p.v. When something is completely destroyed by heat or fire, it burns up.

23. FOCUS ON: two-word phrasal verbs that require an additional particle when used with an object, 2

As we saw in Section 9, many phrasal verbs that can be used both intransitively and transitively require a second particle when they are used transitively, which makes them three-word phrasal verbs.

Although these phrasal verbs have a three-word version, they remain classified as two-word verbs because the two-word and three-word phrasal verbs have the same meaning — they are variations of the same verb:

- He filled in. He filled in for Mike.

There are, however, three-word phrasal verbs that share the same verb and first particle as another two-word phrasal verb but have an entirely different meaning. These are two different phrasal verbs and are classified separately:

- He put up a poster.

- He put up with her rudeness.

25. FOCUS ON: phrasal verbs and have to, have got to, and must

Have to, have got to, and must have two important uses in English. One is familiar to most students, the other is not.

But before discussing that, let's pay special attention to have got to. Have to and have got to mean exactly the same thing. Both are commonly used, and both are acceptable standard English. Have to derives from have, and have got to derives from have got. So why the got in have got to? A good question. Got in have got to means nothing and serves no purpose whatever. Have got to is a unique, idiomatic variation of have to. There is no point in trying to understand the grammar of have got to because there isn't any. Like other idioms, it must simply be memorized. Though have to and have got to mean the same thing, their forms are different, especially in questions and negative sentences. In the examples below, the contracted forms are the most common in everyday spoken English:

statement: You have to come down.        You have got to come down.
You have to come down.        You've got to come down.

question: Do you have to come down?    Have you got to come down?

negative: You do not have to come down.        You have not got to come down
You don't have to come down.        You haven't got to come down

Requirement

Have to, have got to, and must are both used to say that something is required, necessary, mandatory — there is no choice in the matter:
You have to make up the test.
You've got to make up the test.
You must make up the test.

Although most students learn this use of must early in their studies, it is actually the least common way to use must. Both have to and have got to are much more commonly used for this purpose.

**Near certainty**
The other important use of have to, have got to, and must is to say that something is 99 percent certain — that based on the facts and based on what we see and know, no other conclusion is possible about something. We are 99 percent certain, and all we need is confirmation to be 100 percent certain:

Janice, you have been working for 12 hours without a break. You have to be tired. (A logical assumption, but until Janice confirms that she is tired, the speaker cannot be 100 percent certain.)

I would never take that book out of this room. It's got to be here somewhere. (A logical assumption, but until the speaker finds the book, he cannot be 100 percent certain that it is in the room.) That man is from Japan. I've never spoken with him, but he must speak Japanese. (A logical assumption, but until the speaker hears the man speaking Japanese, he cannot be 100 percent certain.)

When have to, have got to, and must are used in this way, it is must that is more common than the others. Have to and have got to, when used for this purpose, have greater emphasis and are used for dramatic effect:

Mark has to be the biggest idiot in the entire world.
Where is Lydia? She's got to be here somewhere.

26. FOCUS ON: phrasal verbs and the adverb back
The adverb back is sometimes used with phrasal verbs to mean again. The following sentences
have the same meaning:

We got together again. We got
back together.

Back is always placed directly before the particle. When back is used with separable phrasal
verbs, the object must separate the verb and particle, and back must be placed between the
object and the particle:

I put the engine back together. I put back
together the engine.

Do not confuse the adverb back, which modifies phrasal verbs, with the particle back that is
part of some phrasal verbs (and has the same meaning of again).

27. FOCUS ON: phrasal verbs with the particle off and the adverb right

The particle off is used in many phrasal verbs to say that something is separated or removed:

The cup handle broke. (The handle is broken, but it is still attached to the cup.) The cup handle broke off. (The handle is no longer attached to the cup.)

Right, discussed in Section 19, is often used with these phrasal verbs to indicate that the action of the verb happened quickly:
He washed the dirt off. (The dirt was removed.) He washed the dirt right off. (The dirt was removed quickly.)

Remember that right can be used in this way only after an object that separates the verb and the particle:

He washed the dirt right off. He washed right off the dirt.

29. FOCUS ON: phrasal verbs and *might*, *may*, and *can*

**Possibility: may and might**
Both *may* and *might* are used to express a medium level of possibility. When *may* and *might* are used to express possibility in the present or future, their meaning is the same, but *may* has a slightly more formal sound. *Might* is slightly more common in everyday American English:

Nancy *might* drop *in* tonight. Nancy *may* drop *in* tonight.

The speaker believes that the possibility that Nancy will *drop in* and the possibility that she will not *drop in* are approximately equal.

**Requests: may and might**
Both *may* and *might* are used to make requests. *May* has a formal sound, and is less common than *might*. *Can* is the most common in American English:

- most common: Can *I* drop *in* tonight?
- formal: May *I* drop *in* tonight? very rare: Might *I* drop *in* tonight?

**Permission: may and can**
*May* and *can* are also used to give permission. In this case, *may* is much more formal and is much less common than *can*. *Might* is not used for this purpose:

You can *drop in* after dinner. You *may* drop *in* after dinner.

30. FOCUS ON: participle adjectives formed from phrasal verbs, 2

As we saw in Section 14, the past participles of many phrasal verbs can be used as participle adjectives. The adverb all is sometimes used to emphasize participle adjectives with the meaning of very or completely. But the sentence must be logical — all is used only to emphasize a participle adjective that describes a condition that can be partial, less than complete, and so on. Look at this example with very and two ordinary adjectives:

makes sense: He's very sick. does not make sense: He's very dead.

The first sentence above makes sense because it is possible to be very sick, but the second does not make sense because it is not possible to be very dead.
makes sense: The man is all spaced-out. does not
make sense: The man is all locked in.

The first sentence makes sense because it is possible to be slightly spaced-out, but it is not possible to be slightly locked in (a door is either locked or it isn't).

When all is used with the meaning of very or completely in a sentence with a plural subject, it is identical in appearance to all's more common meaning of all the people, all the things, and so on.

The men are all spaced-out.

This sentence is ambiguous: it could be understood to mean that every man is spaced-out or that the men are completely spaced-out.

33. FOCUS ON: phrasal verbs and midsentence adverbs

As we saw in Section 17, adverbs are words that modify verbs. Some adverbs are called midsentence adverbs because they are commonly placed in the middle of a sentence. Midsentence adverbs are usually placed before main verbs:

- He **goofs around**. She X **helped** him out.

  after any form of be:

- He is X **goofing around**. She wasn’t X **helping** him out.

  and between an auxiliary (helping) verb and the main verb:

- He will X **goof around**.
- She can’t X **help** him out.

In questions, a midsentence adverb is usually placed between the subject and the main verb:

- Does he X **goof around**?
- Is he X **goofing around**?
- Has she X **helped** him out?

The following are common midsentence adverbs.

34. FOCUS ON: pronunciation of two-and three-word phrasal verbs, 2

As we saw in Sections 5 and 6, phrasal verbs are sometimes accented on the verb and sometimes accented on the particle. It might seem difficult to know whether to accent the verb or the particle since it depends on whether the phrasal verb is separable or nonseparable, transitive or intransitive, or a two- or three-word phrasal verb; however, it boils down to this: always accent the particle after the verb unless the phrasal verb is a nonseparable, transitive, two-word phrasal verb — then accent the verb. Remember that some verbs can be both transitive and intransitive:

Nonseparable, two-word, intransitive
   stick ROUND
   float ROUND

Nonseparable, two-word, transitive
   STICK to
   STAND for
   STICK around
   FLOAT round

Nonseparable, three-word, transitive
   lead UP to

Separable, two-word, transitive
   take BACK
   do OVER

Separable, three-word, transitive
   put UP to

38. FOCUS ON: the verb keep and adverbs and adverbials showing degrees of variability

Phrasal verbs with keep
Several phrasal verbs are based on the verb keep, and it is important to understand that
the essential meaning of keep in these phrasal verbs is no change. As you study these
verbs, remember than in each meaning of each verb something is not changing,
something is continuing in the same direction or in the same manner, or something is
staying in the same place or in the same condition.

Adverbs and adverbials showing degrees of variability
A variety of adverbs and adverbial groups of words that together function as adverbs are
used to modify phrasal verbs that relate to something variable, such as distance, time,
cost, speed, temperature, amount, or quantity.

Adverbs and adverbials allow the speaker to be more precise about what is being
measured — to say whether it was a little or a lot or to be precise about exactly how
much. But the verb must be something that is variable. In cannot be something either/or,
such as shut off, for example (a TV is either on or off — it cannot be in between).
Adverbs and adverbials are used to strengthen the meaning of the verb:

He fell asleep on the train and went well beyond his stop.
She fell way behind in her work when she was sick.
Keep far away from the fire.

to weaken the meaning of the verb:

I went a bit over my budget.
Keep slightly to the right on that road.
He fell a little behind.

The meeting may run somewhat over.
or to be exact:
  
  *We planned two weeks ahead. We planned two weeks ahead.*
  
  *Go three floors up. Go three floors up.*

Sometimes, in informal English, *way* is repeated for extra emphasis:

*What Jim said went way, way, way beyond impolite — it was outrageous.*

40. FOCUS ON: gerund phrasal verbs vs. phrasal verbs followed by the -ing form

We have seen in previous sections that phrasal verbs are sometimes followed by the -ing form. We have also seen that transitive phrasal verbs sometimes take gerund objects. At a glance, there seems to be no difference between these two constructions:

Jim went away **singing**.

Jim stuck with **singing**.

But because a gerund is a verb functioning as a noun, it can be replaced with an ordinary non-gerund noun. However, this is not true of the -ing form:

Jim went away it...Jim
stuck with it.

41. FOCUS ON: two-word phrasal verbs with the particle in that require into when used with an object

We have seen in Sections 9 and 23 that some two-word phrasal verbs require a second particle when they are transitive, which makes them three-word phrasal verbs. Many phrasal verbs with the particle in have a meaning that relates to entering or penetrating. When what is being entered or penetrated is named, these verbs become transitive; however, this is not done by adding a second particle but by changing in to into. Another way to look at it is to consider intro two particles, in and to, written as one word:

The thief broke in.
The thieves broke into the jewelry store.

But this is true only for meanings of the phrasal verb that relate to entering or penetrating, not for all meanings. Some meanings with in have no into version (and are included in this section), and some meanings with into have no in version (and are not included in this section). Moreover, sometimes into is optional, and the verb can be used transitively with either in or into.

We see also in this section that there is often a phrasal verb with an opposite meaning with in and into corresponding to out and out of:

I sneaked in.
I sneaked out.
I sneaked into the house.
I sneaked out of the house.

42. FOCUS ON: phrasal verbs with get, 1

Many phrasal verbs are based on the verb get, and it is important to understand that the meaning of get in these verbs is not the same as the nonphrasal form of get, meaning receive. Instead, get has a meaning similar to become or change to:

I got up at 6:00. (I was not up before, and then I became up — I changed from not being up to being up.)

Many phrasal verbs with get that relate to a change in physical location might seem identical in meaning to a variety of phrasal verbs using come, go, and other verbs that describe physical movement, such as walk, run, move, and so on, and often they can be used with little difference in meaning:

I came back last night. I got back last night.

But there is a difference: get emphasizes the change in location; come, go, and so on, emphasize the movement from one location to another.

It is very common to use the adverbs right and back with get phrasal verbs. To review the adverb right, see Sections 19 and 22. To review the adverb back, review Section 26 (and do not confuse the adverb back with the particle back).

Note that two forms of the past participle of get are shown: gotten and got. Gotten is more common in American English, but got is occasionally used. Both are correct.

43. FOCUS ON: modals and present perfect phrasal verbs

Remember that the present perfect is formed with have or the contraction ‘ve and the past participle. The only difference is that has is not used for the third person singular:

He has run up a big bill. He would have run up a big bill.

The meanings of the modal and semimodal auxiliaries are unchanged in the present perfect, except for may and might.

Past speculation and you do not know what happened: might have or may have

When discussing something that was possible in the past and you do not know what happened, either might have or may have can be used:
I wonder where Jim is. He might have stopped off at the bar. I wonder where
Jim is. He may have stopped off at the bar.

Because you do not know whether Jim stopped off at the bar, either might have or may
have can be used.

Past speculation and you know what happened: only might have
When discussing something that was possible in the past and you know what happened,
only might have can be used:
Climbing that tree was stupid. You might have fallen out. Climb that
tree was stupid. You may have fallen out.

Because I know that the person I am talking to did not fall out of the tree, only might have
can be used.

44. FOCUS ON: participle adjectives and passive phrasal verbs with the verb *get*

It is important to understand two different but related uses of *get* in forming the passive voice.

**get + adjectives: get = become**

It is very common in English to use *get* followed by an adjective. This is not the passive. In this case *get* is similar to *become*:

*She got sick yesterday.*

*She became sick yesterday.***

**get + past participles: a form of the passive**

It is also very common to use *get* in place of *be* to form the passive voice. The construction is the same; *get* is followed by the past participle:

*Judy got kicked out of school.*

*Judy was kicked out of school.*

There is a difference, however, between the passive formed with *be* and the passive formed with *get*: When the passive is formed with *get*, there is often (but not always) a suggestion that the subject of the sentence was somehow responsible or partially responsible for what happened:

*Judy got kicked out of school.*

A person hearing the sentence above might think that perhaps Judy did something wrong that resulted in her getting *kicked out* of school. Sometimes, to leave no doubt that the subject is responsible for what happened, a reflexive pronoun is used:

*Judy got herself kicked out of school.*

**adjectives: adjective or passive?**

As we have seen, in English the past participles of many verbs are used as adjectives. When *get* is followed by a past participle, it is not always clear whether the sentence is passive or whether the past participle is functioning as an adjective:

340
I got mixed up last week.  
I became mixed up last week.

In the examples above, we can see that the past participle is clearly functioning as an adjective since get can be replaced with become, but notice that the sentence can also pass the by test (discussed in Section 13), which indicates that it is passive:

I got mixed up by all the confusing road signs last week.

Again, we see how closely related adjectives and past participles are in English and how it is not always easy to distinguish between the two. Fortunately, it is not usually very important. What is important is to be comfortable using past participles as adjectives, and the key to doing so is not to understand the difference between true adjectives derived from past participles and past participles with an adjective function but instead to understand that there often is no difference.

46. FOCUS ON: pronunciation of phrasal verbs with the particle into

As we saw in Section 6, three-word phrasal verbs are normally accented on the second, or middle, particle whether they are separable or nonseparable. This also applies to phrasal verbs that convert in to info when they are used with an object. Although these verbs are not made up of three words, recall that into is actually a combination of the particles in and to — two words written as one. For this reason, it is the first syllable of into that is accented:

The speakers are built into the wall.

This is also true of phrasal verbs using into that do not have an in version:

I bumped into an old friend.

47. FOCUS ON: particles used without verbs

The particles of many phrasal verbs, especially phrasal verbs that relate to physical movement, are frequently used alone with a form of be. This is very common in conversation when the verb has already been stated at least once and does not need to be repeated:

Customer: Have you run out of coffee? Store clerk: We’re out of regular coffee, but we’re not out of instant.

Marsha: When do you have to move out of your apartment? Nancy: I have to be out by next Wednesday.

Jim: Did you turn the air conditioner on? Bob: No, it was on when I came in.

Mother: Has your sister woken up yet? Susie: No, she’s still not up.

Using the particle without a verb is also common when a phrasal verb can be understood from the context. Sometimes, only one verb is obvious:

Ra ul: Are you through?
Todd: No, I won’t be through until after 4:00.

If this conversation occurred at a place of employment, the phrasal verb could only be get through. But often, in a particular situation, more than one verb might be understood, but to the speakers it is not important or necessary to be specific about which one:

Carlos: Is Karen in?
Paul: No, she isn’t.

If this conversation occurred in an office building, several verbs might be understood: come in, go in, get in, (be) let in.

48. FOCUS ON: modals and present perfect passive phrasal verbs
In Section 43, we discussed the use of several modal and semimodal auxiliaries in the present perfect. These same modals and semimodals are commonly used in passive sentences. The modal or semimodal is followed by have or the contraction 've, been, and the past participle:

could + have + been + past participle
would + have + been + past participle
should + have + been + past participle
have to + have + been + past participle
must + have + been + past participle
might + have + been + past participle
may + have + been + past participle

Let’s compare a present perfect active sentence containing a modal with a present perfect passive sentence containing a modal:

372
active: Jane might have switched on the light. passive: The light might have been switched on.

As we have seen, the object of the active sentence becomes the subject of the passive sentence. Also, there is no object in the passive sentence, so the passive phrasal verb cannot be separated. The object of the active sentence can be used in a by phrase:

active: Jane might have switched on the light. passive: The light might have been switched on by Jane.

And once again we see that it is not always easy to distinguish between a past participle:

The burglar alarm must have been switched off
(by the night manager because he's the only one with a key).

and a participle adjective:

The burglar alarm must have been switched off (because if it had been on, everyone in the neighborhood would have heard it when the burglars smashed the window of the jewelry store).

49. FOCUS ON: combinations of get, right, back, and to

The focus of this section is an expanded definition of the two-word phrasal verb get to and the three-word phrasal verb get back to. The purpose is to try to make some sense out of a seemingly limitless number of idiomatic combinations of get, to, and various particles and adverbs, in particular right and back, and to demonstrate that many phrasal verbs comprised of get and a particle are actually variations of get to that can be modified with right or back. Remember that back is sometimes part of a phrasal verb and sometimes an adverb used to modify a phrasal verb (review Section 26), although we will see that there is often no difference in meaning between the phrasal verb get back (to), discussed in Section 42, and the phrasal verb get to modified by back (get back to).

The numbers in the chart correspond with the meanings in the definitions.

get to

1. Although the phrasal verb get to is defined here as meaning arrive, it can be understood as the basis for some of the phrasal verbs that were discussed in Section 42:

   Bill got to Peoria. (Bill arrived in Peoria.)
   Bill got back to Peoria. (Bill returned to Peoria.)
   Bill got up to Peoria. (Bill arrived in Peoria from the south.)
   Bill got down to Peoria. (Bill arrived in Peoria from the north.)

380
Bill *got over* to Peoria. (Bill arrived in Peoria from the east or west.)

Bill *got out* to Peoria. (Bill arrived in Peoria from the east or from a larger city.)

We see that *get back (to)*, *get up (to)*, *get down (to)*, *get over (to)*, and *get out (to)* are variations of *get to* but with additional information. These verbs can be modified with *right*, meaning *immediately, quickly, or directly* (see Section 10):

*Bill got right back to Peoria. (Bill returned to Peoria quickly.)*

381
Get to work has two meanings, similar but not the same. Get to work can refer to an arrival at a place where someone works:

Ann got to work. (Ann arrived at the place where she works.)

But get to work (see meaning 3) can also mean start working, without any reference to a change of location:

Joe got to work. (Joe started working.)

Joe got back to work. (Joe started working again.)

Joe got right to work. (Joe started working immediately.)

Joe got right back to work. (Joe started working again immediately.)

The difference in these two meanings is illustrated by the following sentence:

I got to work at 9:00, but I didn't get to work until 10:00, which can paraphrased as I arrived at my office at 9:00, but I didn't start working until 10:00.

2. Although the phrasal verb get to is defined here as meaning reach a certain level, number, or amount, it can be understood as the basis for some of the phrasal verbs discussed in Section 42:

Jane got to 120 pounds.

Jane got back to 120 pounds. (Jane weighs 120 pounds again.)

Jane got up to 120 pounds. (Jane used to weigh less that 120 pounds.)

Jane got down to 120 pounds. Jane used to weigh more that 120 pounds.)

We see that get back (to), get up (to), and get down (to) are variations of get to but with additional information. Get up (to) and get down (to) can be modified by back:

Jane got back up to 120 pounds. (Jane used to weigh 120 pounds, lost weight, and then gained it back.)

Jane got back down to 120 pounds. (Jane used to weigh 120 pounds, gained weight, and then lost it.)

3. If you start to do something, you get to it:

I'll try to get to my homework after dinner.

If you start to do something, stop doing it, and then later start to do it again, you get back to it:

I'll try to get back to my homework after dinner.

If you start to do something, stop doing it, and then later quickly start to do it again, you get right back to it:

I'll try to get right back to my homework after dinner.

Remember that when both right and back are used, right always comes first:

I'll try to get back right to my homework after dinner.

50. FOCUS ON: Keep at it!
I hope the time and effort you've put into finding out more about phrasal verbs has paid off. If you've knocked yourself out, stuck with it, and not fallen behind or gotten mixed up or burned out, a great improvement in your ability to understand and use English has come about — you've ended up being better able to figure out what you read and hear and better able to come up with the right word when you write or speak. But don't get stressed out and give up if you can't remember every meaning of every verb — improving your vocabulary takes time. It comes down to regularly brushing up on what you have learned and, when you come across a word you don't know, looking it up in a dictionary. Keep at it!

When questions require complete sentences as answers, several variations of the answer are often possible depending on whether contractions are used, whether separable phrasal verbs are separated, and whether the object of the phrasal verb is repeated in the answer, replaced by a pronoun, or ellipted (not repeated because it is understood). The answers given below would be natural and likely in everyday American English — contractions are used more often than not and separable phrasal verbs are separated more often than not — but any grammatical and logical sentence with the correct verb in the correct tense is acceptable. Phrasal verbs separated by their objects (but not adverbs or adverbials) are indicated with three dots between the verb and particle. Remember that questions asked with / or we are answered with you, and questions asked with you are answered with / or we.
