### English Words of the Year 2015

Today we will look at the English words of the year 2015, as noted by the *Collins English Dictionary*. These are the words and phrases in the UK that Lexicographers have noticed a significant rise in their usage over the last year.

We'll start with the 'word of the year' that according to Collins is *Binge-watching*. This is where we stay in to watch more than three episodes of a series in a day. Apparently, 90% of Brits now do this!

*Manspreading* is a new popular word. This is when a man takes up too much room with his legs spread wide when on public transport, especially on the tube. The term *transgender* has also grown in popularity. It refers to someone who used to be a man but who is now a woman and vice versa.

Two IT rising words are *contactless* and *swipe*. *Contactless* refers to a new way of paying without physical contact using, for example, a debit card. *Swipe* is to move a finger across a touchscreen (left or right) on a mobile phone, for example, to approve or dismiss an image.

*Shaming* is attempting to embarrass a person or group by drawing attention to their perceived offence, especially on social media. Another rising word is *Corbynomics*. This refers to the new UK Labour Party leader Jeremy Corbyn and the new economic part of his policy vision.

Too much binge-watching can lead to *dadbod*. This is an untoned and slightly plump male physique. *Ghosting* means ending a relationship by simply ceasing contact without warning with another person. Lastly *clean eating* is where you follow a diet that allows only natural foods and is low on sugar, fat and salt.

The words of the year 2015 offer a fascinating snapshot of the ever-changing English language.
